## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments filed 22 November 2006 have been fully considered but they are not persuasive. Applicant submits that Chadwick et al. does not disclose or suggest the feature "reflecting said signal back to said first equipment in a variable manner that varies corresponding to a first bit sequence". The examiner respectfully disagrees. Chadwick et al. discloses as cited in the previous office action transmitting a bit pattern generated by a PN generator and the transmitted bit pattern is reflected back to the first equipment. With the PN generator each bit sequence will be different (variable) and thus the reflection of the first bit sequence and each bit sequence thereafter would inherently be variable according to a first bit sequence and subsequent sequences thereafter. Thus Chadwick et al. discloses the limitation of claim 1. Therefore the examiner respectfully maintains the rejections cited in the previous office action.

### *Conclusion*

2. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 2611

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
